Maginhawa Community Plaza

Johann A. Claveria
ARCH 22 Prof. Gozon

A culture formed by the values of *Bayanihan* and *togetherness* is at the very bedrock on which the Maginhawa community is built. The design of this modern landmark hub empowers residents and visitors to not only experience, but to also advance these principles that every Filipino must hold dear.

A profound reverence of this very culture is present throughout the design. Dominant motifs include the forms of gift boxes and scaffolding - eye-catching symbols of community-building. Tropical design techniques of responsive sun shading and passive cooling both celebrate and further encourage climate action.

Eateries unify diverse groups of visitors through the shared experience of good and authentic food. Town halls foster assembly, healthy debate, involvement, and activism. A dedicated community pantry commemorates the powerful contributions that Maginhawa residents continue to make towards forwarding the story of Filipino democracy.
